How do ICT teachers know how to teach

Research Questions

- How do teachers plan Computing lessons?
 - How is PCK enacted through pedagogical reasoning?
 - How is subject knowledge addressed?
 - How were resources used?

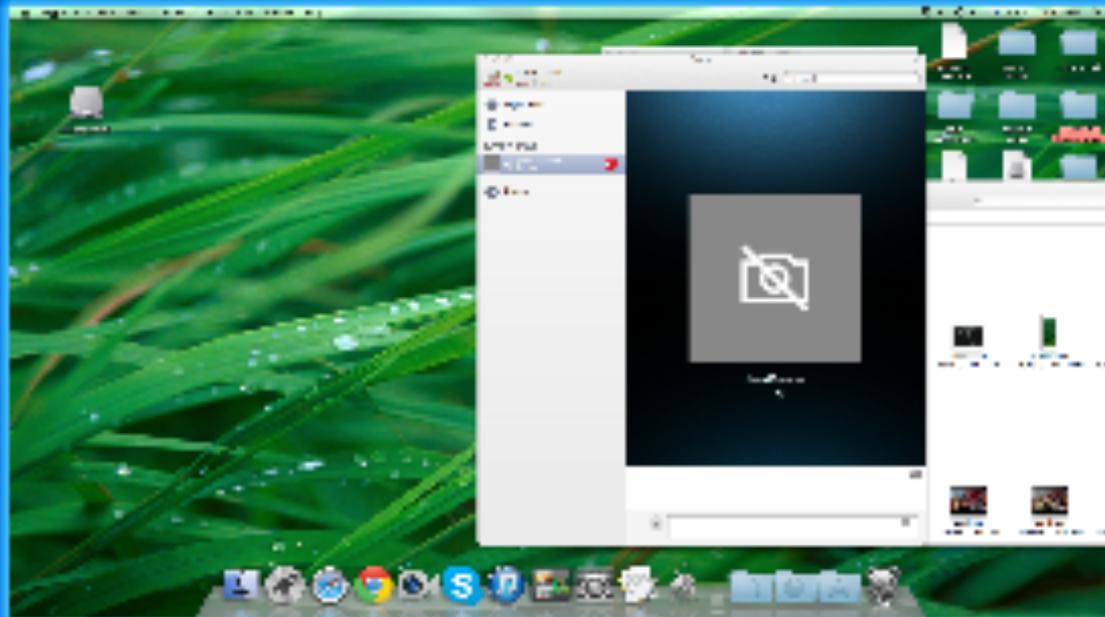

Methods and analysis

- Nine teachers – primary x2, secondary x6, FE x1
- Captured lesson planning on video or through Skype
- Thematic analysis using frameworks as a starting point
- Triangulated against schemes of work, other documentation

Findings

- Transitional pedagogical reasoning
- External knowledge validation – resources and support
- PCK by proxy – the educative role of resources

Conclusions – raising aspirations needs secure foundations

- The importance of time for professional development
- The value of frameworks for understanding teachers' knowledge and skills
- Recognising the educative role of resources – capturing and sharing pedagogical meta-data
